EXPERIENCE

Software Engineer

Cybrary   08/2017 - Present   Greenbelt, MD

- Build out the next generation of the company's web-based platform using JavaScript, React, PHP, Laravel, and other technologies/frameworks;
- Ship high quality, maintainable, extensible code on time in adherence to SDLC, best practices, and design/style guides;
- Provide constructive, actionable feedback to members of the Engineering team;
- Support and maintain production systems when alerts are escalated to the Engineering team;
- Interview, evaluate, and recruit engineering candidates

Web Development Immersive Instructor

General Assembly   07/2017 - 08/2017   Washington, D.C.

- Taught 20 students how to build web applications using a wide variety of the latest technologies and methods;
- Developed curriculum to keep lessons update to date with current and emerging web technologies such as ES7, React JS, Node, and Express;
- Graded and provided feedback on labs, assessments, homework, and projects

Computer Science Teaching Assistant

General Assembly   06/2017 - 07/2017   Washington, D.C.

- Assisted in teaching a pilot course on computer science fundamentals: data structures and algorithms;
- Facilitated daily Scrums and one-on-one meetings with students;
- Gathered and analyzed surveys and feedback everyday from students to help improve the curriculum for future implementation

Web Development Immersive Student

General Assembly   01/2017 - 04/2017   Washington, D.C.
https://github.com/ericcgreen

- Developed four individual full functioning apps each in specific coding languages and each under tight time constraints;
- Won an eight-hour Hackathon sponsored by the French Embassy and hosted by General Assembly

SKILLS & TECHNOLOGIES

JavaScript/jQuery, ReactJS, PHP, Laravel, HTML, CSS/SASS/LESS, Ruby on Rails, AngularJS, ExpressJS, NodeJS; SQL, PostgreSQL, MongoDB; Apache, Linux, CMS, GitHub; Scrum, MVC, TDD, ERDs, Responsive Design, Agile Development, Photoshop, iMovie, FinalCut Pro;

WEB DEVELOPMENT PROJECTS

Thoreau

https://thoreau.herokuapp.com/#/
Developed a news article honesty rating app which is a clone of FactChecker & Politifact; built using MongoDB, ExpressJS, AngularJS, & NodeJS

FarMart

https://cabralsylvester.github.io/Project3_FarMart/
Collaborated in the development of a farmers market board that utilizes Rails for the back end and AngularJS for the front end

Safe Travels

https://wdi-safe-travels.herokuapp.com/users/sign_in
Developed a travel destination safety rating app built with Ruby on Rails
